

Good Morning Everyone,

It has taken a lot of effort for us to get this point. Our mailboxes are almost 21 years old. We have gotten a lot of miles out them but they all are showing the wear and tear of their age. Time to replace them.

Just FYI as why we cannot buy any replacement boxes of our current wooden design... The Board had been talking to the manufacturer. The manufacturer said that USPS had put restrictions and guidelines on this box and they did not know if they were going to make them anymore. We got a call and were informed that due to these regulations they will not be making them. So, this brings us to where we are today.

Here are the selling points of why we think this new mailbox system fits our needs.

-It can be seen in place when you drive into Stonebridge. They have the same set up. It will be our exact color and design. Take a drive and see for yourself.

-Those who have seen them all have said they look great.

-The dark bronze color chosen is very neutral and richer looking than black. It does come in black but we hope that you agree that the black is more of a cold color if you place it front and center.

-Rugged but with a nice design.

-Well balanced. Ours is very front heavy and that is why over time they are all leaning forward. Notice that the weight of the mailboxes is evenly distributed because the resting position of the mailbox is dead centered. We are hoping this will eliminate this tendency to lean forward. Only a few have this design because it makes it more expensive to manufacture.

-Priced right. The biggest expense is the installation of them. Very labor intensive. Not many people want to do this. A contract is in place for purchase and installation.

-They have both setups available that we need. Single and the side by side.

-Note: we will be custom making the addresses to be placed on the front of mailboxes. We will use a 3M adhesive material. We are hoping that we can match the color background of our new boxes and have the address in white. It will look very classy and can be seen easily by USPS/UPS/FedEx.

OUR MAILBOX SYSTEM AND COLOR COMES UP FIRST. **THE ANTIQUE RURAL BRONZE MAILBOX WITH DELUXE POST.**

We hope that you agree that this is a good bang for our buck. These will be ordered next year but what we have to decide and **vote for** is do we order them **WITH the newspaper box or WITHOUT the newspaper box**. There is a cost difference. The majority will rule. We will then order them in depending on the outcome. So please vote by responding to this e-mail BY NO LATER THAN JUNE 5TH.

See what our cost will be for both [HERE](#).

We have multiple homeowners who have not given us an e-mail address to use so we have to place in everyone's box this attachment below so no one can claim they did not know about the special assessment come Jan.2022 in our annual dues notice. Remember, one vote per household.

Thanks everyone.
